DocuTrace Intelligent Analysis

Reference Document (A):	Smart Campus IoT Architecture (Original Research)	**Overall Similarity:**	**57.1%**
Submitted Document (B):	Smart Campus IoT Architecture (Paraphrased Submission)	**Assessment:**	**MODERATE SIMILARITY / PARAPHRASING**
Sentences Inspected:	**5** sentences in Doc B	**Breakdown:**	**1** Exact | **3** Paraphrased | **1** Unique

● **Exact Match (100% Identical)** ● **Paraphrased / Substituted (Word changes)** ● **Unique Content (Original to Doc B)**

Detailed Sentence Alignment & Modification Log

Direct comparison of each sentence in the submitted document against its closest reference match.

Sentence #1

EXACT DUPLICATE (100.0%)

Reference (Smart Campus IoT Architecture (Original Research)):

The Smart Campus System deploys distributed Internet of Things sensor networks to monitor resource allocation.

Submitted (Smart Campus IoT Architecture (Paraphrased Submission)):

The Smart Campus System deploys distributed Internet of Things sensor networks to monitor resource allocation.

Sentence #2

PARAPHRASED / SUBSTITUTED (76.9%)

Reference (Smart Campus IoT Architecture (Original Research)):

Automated energy consumption tracking reduces utility costs by forty percent during academic terms.

Submitted (Smart Campus IoT Architecture (Paraphrased Submission)):

Automated power consumption tracking diminishes utility expenses by forty percent during academic terms.

Word Substitutions Detected: **energy** → **power** | **reduces** → **diminishes** | **costs** → **expenses**

Sentence #3

PARAPHRASED / SUBSTITUTED (83.3%)

Reference (Smart Campus IoT Architecture (Original Research)):

Our centralized framework aggregates environmental metrics from classroom sensors and student portals.

Submitted (Smart Campus IoT Architecture (Paraphrased Submission)):

Our unified framework gathers environmental metrics from classroom sensors and student portals.

Word Substitutions Detected: **centralized** → **unified** | **aggregates** → **gathers**

Sentence #4

PARAPHRASED / SUBSTITUTED (66.7%)

Reference (Smart Campus IoT Architecture (Original Research)):

Security protocols guarantee student confidentiality through end-to-end cryptographic safeguards.

Submitted (Smart Campus IoT Architecture (Paraphrased Submission)):

Security measures guarantee pupil privacy through end-to-end cryptographic safeguards.

Word Substitutions Detected: **protocols** → **measures** | **student** → **pupil** | **confidentiality** → **privacy**

Sentence #5

UNIQUE CONTENT

Reference (Smart Campus IoT Architecture (Original Research)):

Future development will incorporate predictive machine learning models to forecast campus parking demand.

Submitted (Smart Campus IoT Architecture (Paraphrased Submission)):

Subsequent research will examine autonomous electric shuttles across university transit corridors.
